

Sign PDF

1. when you have created a certificate (the path of the digital certificate to use. Must be PKCS#12 certificate (.PFX, .P12).) go to the Templates in CDO Menu. (Continia doesn't provide the service of purchasing a certificate, this must be done from one of the existing providers)
2. Choose the Template you want to edit and Import Certificate:
3. Select Actions and Import Certificate for digital signing PDF

4. When the certificate is imported you need to fill in Password: (the PDF Sign File Name, comes from the imported certificate)

SIGN PDF
