

After installing Continia Document Capture, you must activate the solution.

To start the activation process, either search for "Continia Solution Activation Wizard" or select "**Activate now**" in the message area at the top of the page.

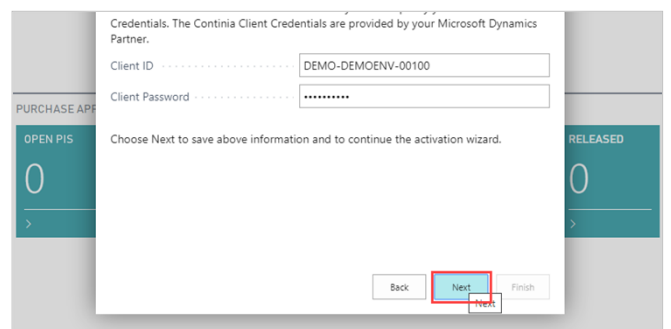

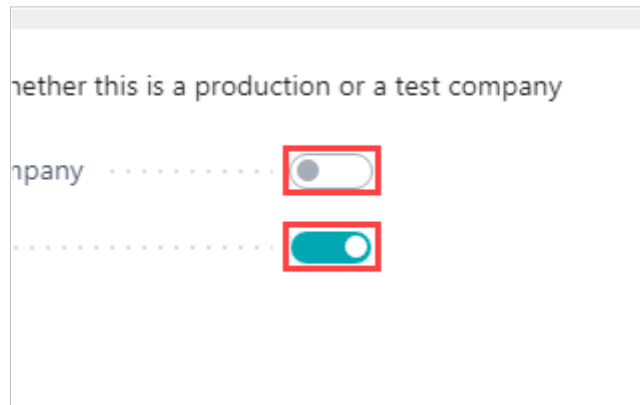

Select "**Next**" to start the wizard.

- Fill in the customer's Client ID provided by Continia Software. Your customer is issued two Client IDs. The Client ID equal to the customer's Microsoft Voice ID is for the production environment, whereas the Client ID starting with "DEMO" is for test environments only.
- Fill in the password for the Client ID entered above.

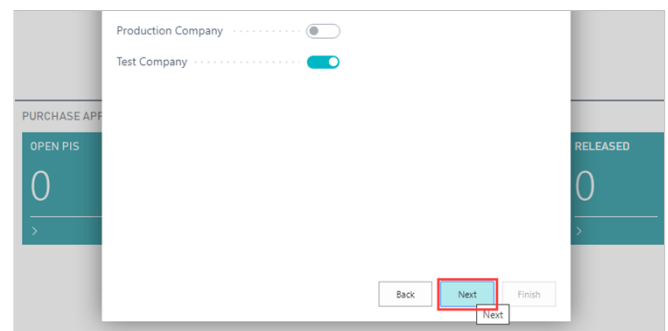

Select "**Next**" to continue the wizard.

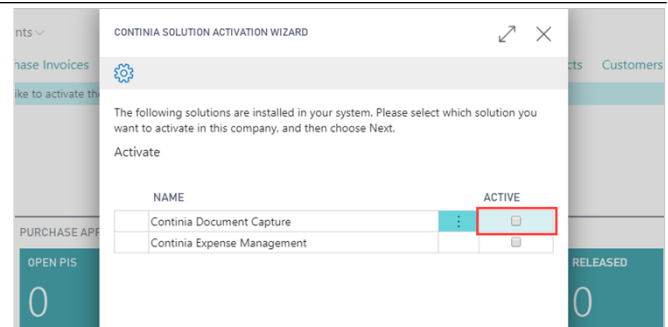

- Depending on the Client ID entered, you must select the appropriate company type you wish to activate.
- In this scenario, the Client ID is for a test company.

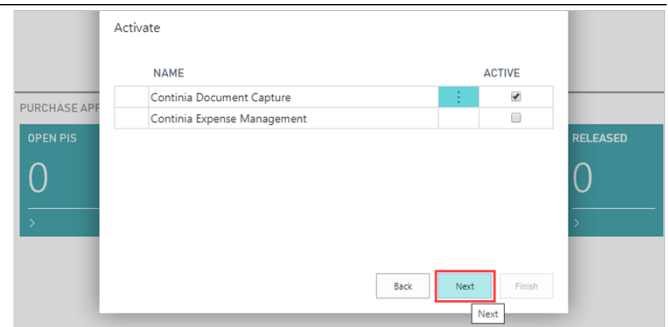

Select **"Next"** to continue the wizard.

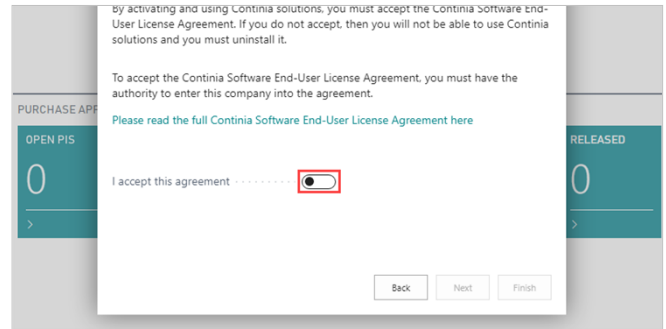

Select the tickbox, in the right-hand side column, to activate Document Capture. If you have multiple Continia solutions installed, the list shows which solutions are activated. In this scenario, two solutions are installed but at the current time none are activated.

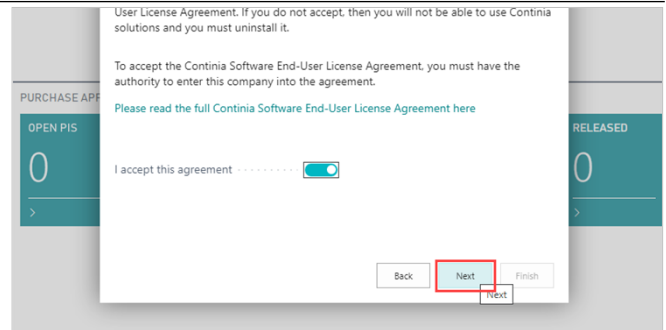

Select **"Next"** to continue the wizard.

Flip the switch to accept the Continia Software End-User License Agreement.

Select "Next" to continue the wizard.

Document Capture is now activated, and you may select "Finish" to end the wizard.
