or 25 transactions

Download and install

To get started, simply install Continia Finance through Microsoft AppSource. When your free trial expires, you are asked to subscribe to Continia Finance in order to continue using the app. This is required even though if you only choose to subscribe to the freemium Essential module.

30-day free trial

With a free trial, you can test Continia Finance and experience the many benefits of using the app. All modules are activated in the trial period enabling you to test all the functionality in the solution right away. Your free trial expires after 30 days from the installation date.

Essential is for free

Unique for Continia Finance is that you will be able to use the Essential module as a freemium (permanently for free) without any underlaying requirements of subscribing to any of the feature modules available.

Bundle offers guarantee a maximum price

If you want to use multiple feature modules, we introduce bundle offers so there is a maximum price. Enterprise Bundle is the maximum price for the use of all modules – and Corporate Bundle is the maximum price for the use of G/L Open Entries, Associations, Extended Financial Reports and Extended Fixed Assets.

Fixed monthly price per feature module per month per production environment

Subscribing for Continia apps happens within the app. All you have to do is to choose the modules you want to use. For Company Groups within the same Business Central tenant but with multiple production environments, the module price is per production environment. Within each production environment, you can use the chosen modules in unlimited companies.
