How do I calculate my price?

The price is calculated within each calendar month and is defined by the number of transactions you process.

A transaction is equal to:

- A posted journal line. If the journal line applies to multiple entries (e.g. if a payment applies to multiple invoices), each entry counts as one transaction. This covers the use of all features that create transactions within the solution (Import, Export, Direct Debit, Service Provider Import etc.)
- Lookups based on external services like IBAN Lookup, Sort Code Lookup etc.
